Grant Activity

Grant Activity - Administration / Coordination			
Description	Administration / Coordination		
Category	ADMINISTRATION/COORDINATION		
Start Date	1-Jan-16	End Date	30-Dec-16
Has Rates and Hours?	Yes		
Actual Results	<p>The past year, Local Water Management funds have been utilized for a number of water resource related activities. The primary task has been the update of the Local Water Plan, a 10-year document that is slated for renewal in February 2018. The work began with identification of county-wide Priority Concerns and the drafting of a Priority Concerns Scoping Document, which was approved by the Water Plan Advisory Committee and state Board of Water and Soil Resources in October 2016. Currently the plan is in development with input coming from townships, cities and county staff on the plan content and direction. The SWCD has led quarterly meetings with the Water Plan Advisory Committee to oversee this process as well. The plan will ultimately outline the status of Sherburne County water resources and identify goals, actions, partnerships and funding opportunities the county may follow in order to address the water resource priorities. Coordination and correspondence with ~10 lake associations / districts has been a secondary component of LWM. Correspondence has occurred on a variety of lake management issues including stormwater runoff, shoreline condition, water quality monitoring, Elk River watershed activities, and more. This is anticipated to be streamlined with the formation of a Coalition of Lake Associations (COLA), which the SWCD Water Resource Specialist has been involved with. The SWCD and a lake group steering committee have begun a scoping process to determine the optimal Sherburne COLA organizational structure as well as identify priorities the COLA would involve themselves with. Once established, the COLA will serve as a networking group and unified voice for lake property owners, as well as a resource for communication and feedback for the SWCD.</p>		

Grant Activity - Monitoring			
Description	Monitoring		
Category	MONITORING/DATA COLLECTION		
Start Date	1-Jan-16	End Date	30-Dec-16
Has Rates and Hours?	Yes		
Actual Results	<p>In 2016 the SWCD monitored 2 sites along the Elk River for E.coli. This monitoring was done in response to the TMDL that was completed for that particular reach of the Elk River, it is impaired for E.coli. The 2 sites were monitored bi-weekly from April 1st to October 31st.</p>
