

# Ann Lake Raingarden

Raingarden

## Project Summary

The property on Ann Lake has 2,500 square feet of impervious surface on top of a hill. According to the landowner when it rains the runoff from the gutters causes serious erosion of the hillside and the runoff leads directly to Ann Lake. Concerned for the lake and her property, Deb Svendsen sought out assistance for a raingarden design from the Sherburne SWCD. Svendsen completed all installation work herself and has in the works more projects to control the runoff on her property.

## **Before installation - May 2013**

## **Project Details**

## **Project Funding**

## **Project Partners**

Date Installed .....June 28th, 2014  
 Area .....300 ft<sup>2</sup>  
 Drainage Area.....2,500 ft<sup>2</sup>  
 # of Shrubs ..... 25  
 # of Plant Plugs..... 31

2013 State Cost Share.....\$474.31  
 Landowner .....\$195.00  
 Total Project Cost.....\$669.31

Sherburne SWCD
