

Nitrate Reduction Cost Share

Sherburne Soil And Water Conservation District

Sherburne Soil & Water Conservation District (SWCD) received funding in 2019 to promote best management practices and alternative management tools that decrease Nitrate leaching to the groundwater. High levels of Nitrate have been identified through the Minnesota Department of Agriculture's Township Testing Program in 2014-2015. There are cost share and technical service opportunities available under this grant.

Practices Available for Cost Share

- Irrigation Water Management
- Irrigation Water Management Technology Upgrades
- Cover Crops, Multispecies and Interseeding
- Alternative Crops
- Nitrogen Management

Technical Assistance Available

- Uniformity Test, Catch-Can
- Ag-Sense Units, Try for a Season
- Cover Crop Design
- Nitrate Monitoring

Interested? Contact Miranda Wagner for program details and cost share rates.
